

An Announcement from Fukui Prefecture

There is an increasing number of cases of pneumonia caused by the Novel Coronavirus, which emerged in December 2019 in Wuhan City, Hubei Province, China.

Pneumonia caused by the Novel Coronavirus can be spread by person-to-person contact

○How to avoid contracting the coronavirus or spreading it to others

- Wear a surgical mask when leaving home
- Don't cough in the direction of another person
- Rinse your mouth and wash your hands often.

※These tips will also help prevent against colds and the flu

○People with a cough and fever

- Please wear a surgical mask
- If you have a cough and fever, please call your nearest health center or health and wellness center.

When you call, if applicable, please tell them “I was recently in (○○○○○)”

Current Regions included: Hubei Province, Zhejiang Province China
